-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 77-104 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 76 of U.S. Patent No. 6,830,964. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the patented claims is the amount of layers. However, in the absence of unexpected results, it would have been obvious to one of ordinary skill in the art to modify the patented claims to have four monolayers as the patented claims encompasses a plurality of monolayers.

patented claims to have four monolayers as the patented claims encompasses a plurality of monolayers.

Claims 77 to 104 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 30 of copending Application No. 10/936,920. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the prior art is the specific device produced. However, the instant claims encompass any device. Thus, it would have been obvious to one of ordinary skill in the art to modify the instant claims to create the device of the copending applications using the same layers.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 77 to 104 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 21 of copending Application No. 10/937,072. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the prior art is the specific device produced. However, the instant claims encompass any device. Thus, it would have been obvious to one of ordinary skill in the art to modify the instant claims to create the device of the copending applications using the same layers.
